---

## SUMMARY

Junior Software Engineer dedicated to constantly improving tools and infrastructure to maximize productivity, minimize system downtime and quickly respond to the changing needs of the business.

---

## SKILL HIGHLIGHTS

- Interface design and implementation
- Active Directory knowledge
- Project Management
- Performance and scalability optimization
- Agile development methodologies
- Requirements analysis and design phases
- Scrum
- Embedded systems development software

---

## FEATURED PROJECTS

### SCOREHOARD

<https://scorehoard.com/> || <https://github.com/JordanBenner/scorehoard> 06/2017

- ScoreHoard allows gamers to send scores (and the usernames associated with the scores) directly into the ScoreHoard servers.
- Built with HTML, CSS, Node.js Express, Javascript and PostgreSQL
- Integrated a custom system that allows direct access to style custom leaderboards and high scores table.

### KODACHROME

<https://www.ertzsebetkodachrome.com/> || <https://github.com/JordanBenner/Kodachrome> 07/2017

- Hired as a freelance developer to develop an ecommerce site to push growth and market picture sales
- built in HTML, CSS, Django, Python, javascript and uses a custom Data-base client.
- Implementing PayPal API to allow for customer checkout and enabled sign in/log in for user accounts

### CONTACTS APP

<http://www.jordan-benner.com/contact-app/> || <https://github.com/JordanBenner/contact-app> 07/2017

- Designed with the app stores in mind to take care of the users contacts, managing data transfer securely without the reliability of conglomerate cloud services
- Built using React, Redux and Firebase to house contacts for a more practical way of storing a data in a database locally and efficiently.
- Using firebase, allows for application data to be synchronized across clients and stored on Firebase's cloud.

---

## EXPERIENCE

## **GROWTH PROPERTY INVESTORS**

Magnolia, Texas

**Co-Founder\Project manager**

04/2012 to Current

- Maintained in-depth knowledge of competition through consistent evaluation of market conditions and trends.
- Achieved the highest possible net operating income by implementing cost control and revenue improvement programs.
- Collected and kept careful records of rental payments.

## **TMC TRANSPORTATION**

Des Moines, IA

**Driver\ Safety Support Team Member**

07/2015 to 10/2016

- Drove trucks with capacities greater than thirty tons, flatbed tractor-trailer combinations, to transport and deliver products, machinery, or other materials
- Checked all load-related documentation to ensure that it is complete and accurate

## **GLOBAL DRILLING SUPPORT**

Houston, TX

**Testing R&D**

11/2012 to 04/2013

- Performed problem solving and resolution for technical quality, inspection, and customer quality issues.
- Wrote technical reports on test and analysis results and facilitated presentations to stakeholders.

## **WEATHERFORD**

Houston, TX

**Project Manager**

08/2008 to 03/2012

- Documented and disseminated the analytical procedures alongside the project team
- Kept accurate and detailed project documents to keep management informed while coordinating back to the project team

---

## **TECHNICAL SUMMARY**

---

- Collaborated to build an API that tracks scores for video game makers. it allows gamers to send scores (and the usernames associated with the scores) directly into the ScoreHoard servers, quickly being integrated into a custom database.
- Worked closely with a professional environment to put together a photography website, to suit the needs of an active customer experience. This platform uses Python, Django, Postgresql and JQuery allowing the client an exponential amount of growth, stability and security for future customization.

---

## **PROFESSIONAL TRAINING**

---

**SOFTWARE DEVELOPMENT**

2017

**Digital Crafts**, Houston, TX, United States

Coursework in Full Stack Software Development.

- Front-End: Javascript, JQuery(5/2017); CSS3, HTML5, Node (6/2017); Babel React, Redux (8/2017)
- Back-End: Python, Django, Nginx (4/2017); PostgreSQL, Ubuntu, Heroku (7/2017); Amazon Web

Services (5/2017)

COMPUTER SCIENCE, DATA SCIENCE

2017

**MITx**, Houston, Texas, United States

Coursework in the Introduction to Computer Science

- A Notion of Computation (4/2017); Python Programming Language, Sorting Algorithms, Testing and Debugging (5/2017); An Introduction to algorithmic complexity Data structures (6/2017).

DATA SCIENCE

2017

**edx**, Houston, TX, United States

Coursework in

- Python, Jupyter Notebooks, pandas(5/2017); Numpy, Matplotlib, Git (6/2017);

---

## ACTIVITIES

---

- Python-houston (pyhou)
- Houston Area Hackers Association (HAHA)
- FreeCodeCamp Houston
- Children's Miracle Network.
- Cystic Fibrosis Foundation.
