DEVELOPMENT EXPERIENCE

Erzsebet Kodachrome
- Hired as a freelance developer to develop an ecommerce site to push growth and market picture sales
- Implemented CMS System (content management system to allow for customer checkout.
- Utilizing 6 hours of time and over three thousand lines of CSS
- **Built with HTML, CSS, Django, Python, JavaScript and uses a custom database client**
- **Designed layout using Axure, photos exported through Photoshop and graphic work in Illustrator**

ScoreHoard
- ScoreHoard allows gamers to send scores (and the usernames associated with the scores) directly into the ScoreHoard servers
- Integrated a stripe API and designed every aspect of this app from the ground up, inside of a week.
- **Built with HTML, CSS, Node.js Express, JavaScript and PostgreSQL**
- **Designed layout using Axure and logo designed in Illustrator**

TimberGrove
- Designed under an NDA for a client, the app collects data such as flight time, engine temperature, altitude, location while mapping its flight trajectory in real time and displays the information to the user.
- Utilizing Recharts and a Mapbox API, Timbergrove will be able to display the information given in a very precise and technical manor, allowing the user access to the most detailed amount of data that can be displayed.
- **Built with React, mongoDB, Express, JSX, and AWS**
- **Designed layout using Adobe Experience Design**

PROFESSIONAL EXPERIENCE

Prior Work Experience, Various Locations
- **Growth Property Investors** – Owner/Serve as a project manager   4/2012 - Present
